RE: No Spring Clean Up.

Reminder from February 2020 Newsletter - Once a year clean up

The cost for the spring and fall clean-up have been going up; along with persons outside of our community placing materials at our curbside. Several of you have seen many toilets; numerous televisions, branches from trees that do not exist; and commercial construction materials at curbside. Residential sanitation ratepayers are the only ones that pay for this service. In lieu of raising rates; the South Sioux City Council has decided to go to one clean-up per year in the fall for both garbage and trees.
